19.03.2014. The findings of the said survey revealed that the prices of subject items are higher in the local markets.

6. **Method (s) adopted to determine Customs values:** Considering the foregoing, the valuation methods prescribed under Section 25 of the Customs Act, 1969, were examined and applied in their prescribed sequence for determination of the customs value of the subject goods. The transaction value method envisaged under sub-section (1) of Section 25 could not be adopted, as adequate and verifiable information relating to the adjustments contemplated under Section 25(2) was not available for arriving at an accurate transaction value. Thereafter, the identical goods method provided under sub-section (5) of the Section 25 was evaluated. Although the available import data offered certain indicative references, such data was not considered sufficient for reliance because complete and verifiable particulars regarding quality, specifications, quantities, commercial level, and other comparable characteristics were not available. The similar goods method stipulated under sub-section (6) of Section 25 was likewise considered; however, the available references did not provide an adequate basis for determination of value under this method. The deductive value method under sub-section (7) was also explored through market surveys. However, since the subject goods are sold in a wide range of qualities, and prices, and comparable local market prices could not be reliably matched to the imported goods in all cases, this method could not be applied exclusively. Likewise, the computed value method under sub-section (8) was considered but could not be resorted to, due to the absence of authenticated and verifiable information concerning production costs, processing/conversion expenses, and other associated manufacturing costs in the country of exportation. Consequently, after exhausting the preceding valuation methods in sequential order, the customs values of the subject goods have been determined under sub-section (9), read with sub-section (7), of Section 25 of the Customs Act, 1969, by taking into account the most appropriate and reliable information available on record.

DIRECTOR CUSTOMS VALUATION KARACHI

7. **Customs values for Artificial Flowers and Other Artificial Decoratives** hereinafter specified shall be assessed to duty / taxes at the following Customs values:

S. No.	Description	PCT Heading	Proposed WeBOC PCT	Origin	C&F (US$/KG)
